

Quillmark

PRINT-ON-DEMAND · ZERO INVENTORY · YOU SELL THE DESIGN

The Built-In Package

The complete operating playbook for launching and running a design-led print-on-demand brand — architecture, funnel, feasibility, and a 30-day launch — built to run in 30–45 minutes a day alongside your other ventures.

Architecture

Sales Funnel

Feasibility Study

30-Day Plan

Operating System

Prepared for **the Founder & Board** · A **BNBHubs** venture · May 24, 2026

Confidential strategy document. Projections are planning assumptions, not guarantees.

How to read this in 25 minutes

This booklet is your whole business in one file. Read it top to bottom once (about a 25-minute walk-through) and you will understand exactly what Quillmark is, how the money is made, what it costs to start, and what to do Monday morning.

Know it

§1–2

The 10,000-ft view + the model — 6 min

Build it

§3–4

Architecture + the funnel — 6 min

Fund it

§5

Feasibility + the revenue ladder — 7 min

Run it

§6–9

Scaling, 30-day content, operating system — 6 min

Every section ends with something you can act on. The boxes in **orange** are the highest-leverage moves; the **amber** boxes are the risks to respect.

Working assumption (correct me anytime)

This package was rebuilt from the Quillmark brand kit and the three source documents you already have (the **Income Structure**, the **1–5 Year Board Plan**, and the **Founder & Operator Manual**). It treats Quillmark as a **design-led print-on-demand brand** — your original designs printed on apparel, drinkware, wall art and accessories, with zero inventory. If the originals used different numbers, re-share them (or re-authorize the Google Drive connection) and I will reconcile this to the exact figures.

It runs on a Chromebook

Every tool in this plan is browser-based. No warehouse, no stock, no special hardware. A Chromebook, a phone for content, and 30–45 focused minutes a day is the entire footprint. That is the point of the 'built-in package' — it is designed for a founder running more than one business at once.

Appendix A · Tool & cost reference	33
Appendix B · Glossary & one-page cheat sheet	34

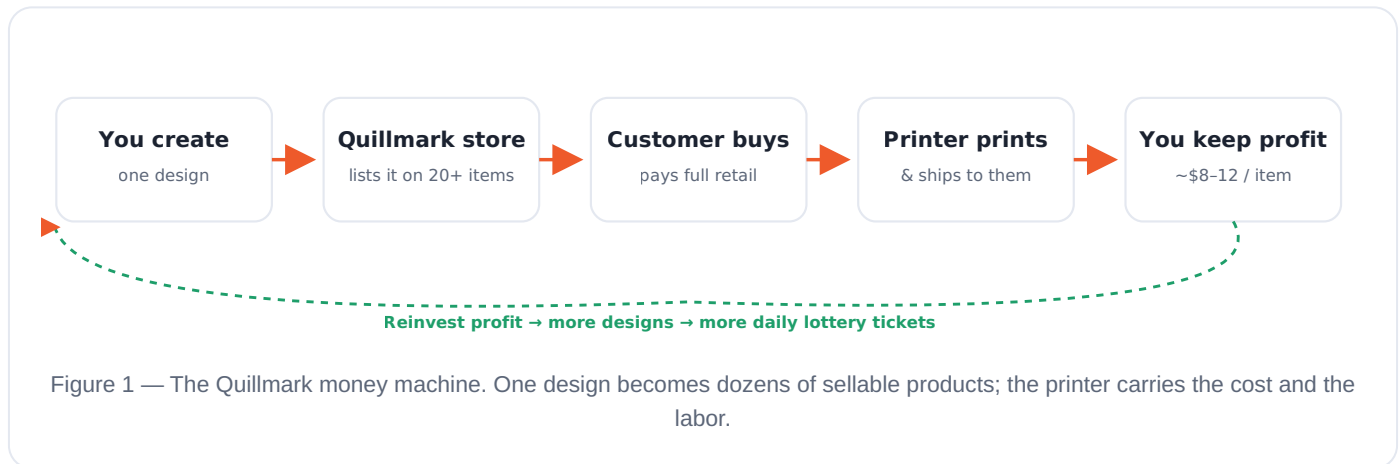

SECTION 1

The 10,000-Foot View

What Quillmark is, why it can win, and the numbers that matter — on two pages.

1 · The 10,000-Foot View

Quillmark is a print-on-demand brand: we publish **original designs** and sell them printed on physical products — t-shirts, hoodies, mugs, tote bags, posters, phone cases. We hold **zero inventory**. When a customer buys, a print partner (Printify or Printful) makes the item on demand and ships it directly to them under the Quillmark name. We keep the margin between the retail price and the print cost.

Why this is the right venture to add now

- **Near-zero downside.** You can launch on Etsy for the price of a few coffees and never hold stock. The risk is time, not capital.
- **It compounds.** Every design is a permanent, 24/7 sales asset. Designs do not expire. A catalog of 150 listings is 150 lottery tickets working while you sleep on the other businesses.
- **It fits a multi-business operator.** The work is batchable and delegatable: design in bulk, schedule content, let automation fulfill. This is why it is a “built-in package,” not a second job.
- **It rides existing skills.** You already run BNBHubs ventures and have a content/PDF engine (NicheQuill). Quillmark reuses the same muscles: pick a niche, make an asset, drive attention, convert.

The one-sentence model

Make a design once → list it on many products → drive cheap attention from short-form video and Pinterest → the printer fulfills every order automatically → you keep **\$8–\$12 profit per item** and reinvest it into more designs.

The numbers at a glance

to start

\$15–\$150

Etsy lean vs. Shopify standard

net margin

~35%

after print, fees & ad cost

profit / item

~\$10

on a typical \$26–\$30 product

to ~\$1k/mo

5–6 mo

base-case, consistent effort

The three reasons it wins

1. **Asset leverage** — designs are evergreen and stack.
2. **Distribution is free to start** — organic short-form + Pinterest + marketplace search.
3. **Automated fulfillment** — the hardest, most expensive part (making and shipping) is outsourced per order.

The honest risks (respected in §8)

1. **Saturation** — generic designs lose; niche + point of view wins.
2. **IP / trademark** — never use protected names, logos or art.
3. **Platform dependence** — own an email list so you are never one ban away from zero.

Board-level take

Quillmark is a low-capital, high-asset, automatable income stream that diversifies BNBHubs without competing for the same hours as the core businesses. Recommendation: fund the lean launch, commit to a 90-day content sprint, and judge it on the leading indicators in §8 — not on week-one revenue.

SECTION 2

The Business Model & Unit Economics

What we sell, how each sale breaks down, and the product ladder that lifts the average order.

2 · The Business Model & Unit Economics

What Quillmark actually sells

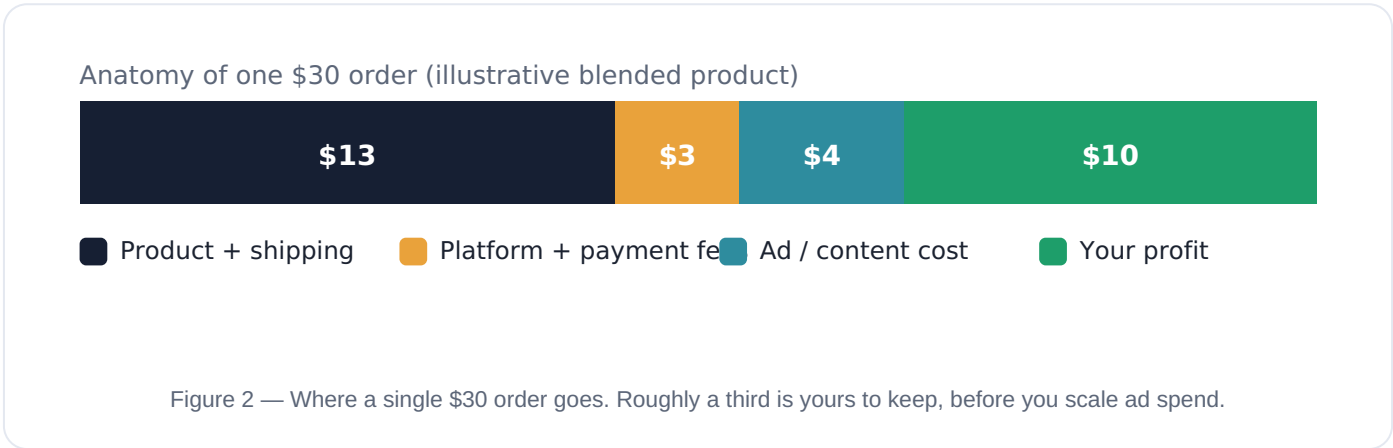

We do not sell “t-shirts.” We sell **a point of view, printed on whatever the buyer wants to wear or display**. The product is the design + the identity it signals. That distinction is the entire moat: anyone can print a blank shirt; the buyer pays for the idea on it.

One design is published across a **product matrix** so a single creative effort earns many ways:

Tier	Product	Typical retail	Print cost (approx)	Gross / item
Entry	Sticker / mug	\$6 – \$16	\$2 – \$6	\$4 – \$10
Core	Unisex tee	\$24 – \$29	\$9 – \$12	\$10 – \$14
Core	Tote / phone case	\$22 – \$28	\$10 – \$13	\$9 – \$13
Premium	Hoodie / sweatshirt	\$42 – \$55	\$22 – \$30	\$15 – \$22
Premium	Framed / large poster	\$28 – \$60	\$10 – \$24	\$14 – \$30

Figures are representative blended ranges across Printify/Printful catalogs; confirm live costs for the exact blanks you choose.

Anatomy of one order

The four levers you control: **(1)** retail price, **(2)** print cost (choose competitive blanks), **(3)** fees (Etsy vs. Shopify), and **(4)** ad/content cost (free organic reach keeps this near zero early on).

Niche strategy — pick a fight you can win

Broad “funny shirt” stores drown. Quillmark wins by owning **specific identities and micro-communities** where buyers are emotional and underserved. Start with 3–5 niches, double down on whatever sells:

Hobby pride (e.g. crochet, disc golf, beekeeping)

Profession humor (nurses, teachers, devs, trades)

Pet-parent / breed-specific

Faith & affirmations

Life-stage & family (new mom, retirement, big sis)

Local pride & events

Gifting occasions (anniversary, birthday no.)

Fandom-adjacent (legal, original art only)

The reuse advantage with NicheQuill

You already produce relationship & self-help content under NicheQuill. Those themes ('couples who budget together,' 'step-parent pride,' 'healing era') translate straight into wearable designs and affirmation wall-art. Quillmark can monetize the same audience insight in a second format — physical product instead of PDF.

Brand & positioning

Quillmark sits under the **BNBHubs** umbrella as the physical-product arm. The brand promise is in the tagline already on your kit: **"Original designs, on everything."** The nib mark signals authorship — these are *made*, not scraped. Keep the look consistent: the flame-orange nib, near-black packaging inserts, a clean modern voice. Consistency is what turns a pile of listings into a brand people follow.

The product ladder (raises average order value)

Stage	Offer	Purpose
Hook	\$6–\$16 sticker / mug	Low-risk first purchase; turns a follower into a buyer
Core	\$24–\$29 tee	The profit engine; most volume lives here
Bump	"Add the matching mug for \$9"	Lifts AOV at checkout with one click
Premium	\$45 hoodie / framed print	Higher margin for your biggest fans
Bundle	"Set of 3, save 15%"	Increases units per order; clears your best designs

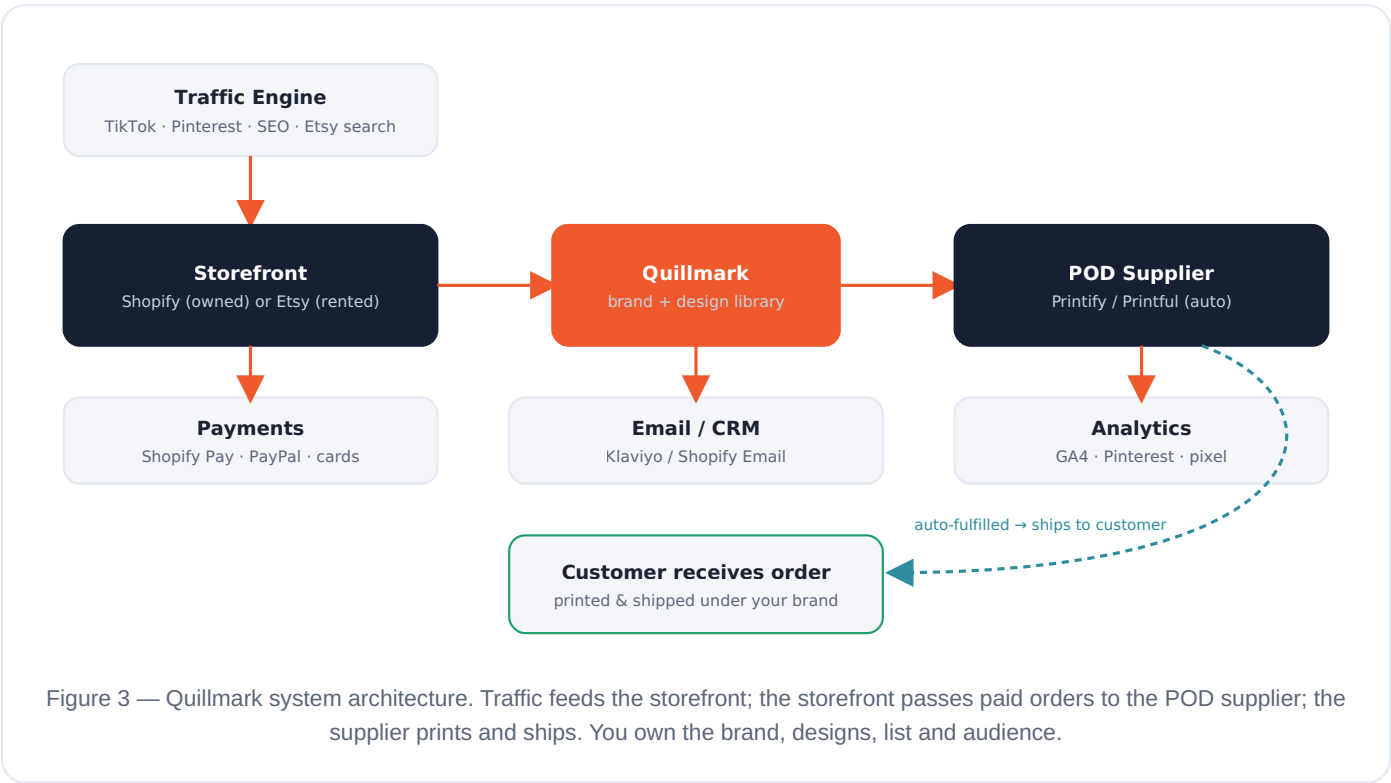

SECTION 3

The Architecture

Exactly how the machine is wired — the same build method behind your other ventures, applied to product.

3 · The Architecture — how it is built

Everything is browser-based and connected so that an order placed at 3 a.m. is designed, charged, printed and shipped without you touching it. Here is the full wiring.

The two ways to run the storefront

	Etsy (rented audience)	Shopify (owned storefront)
Best for	Day-one validation, built-in buyers	Brand, margins, scale, your data
Cost	\$0.20 / listing + ~6.5% + payment fees	\$39/mo + 2.9% + \$0.30 / order
Traffic	Etsy search sends free buyers	You must bring the traffic
Upside	Fast first sales, low effort	Higher margin, email list, no ban-risk to catalog
Risk	Fees stack; you don't own the customer	Slower start; needs marketing from day one

Recommended path
Start on **Etsy** to prove which designs sell with real buyers (cheap, fast feedback). The moment a handful of designs get traction, stand up the **Shopify** store and run both — Etsy for discovery, Shopify for margin and for the email list you actually own.

The full stack (every tool, what it does, what it costs)

Layer	Tool (pick one)	Job	Cost to start
Storefront	Etsy / Shopify Basic	Where customers buy	\$0 / \$39 mo
POD & fulfillment	Printify / Printful	Prints & ships each order	\$0 (pay per order)
Design	Canva Pro + AI image tools	Create the artwork & mockups	\$0–\$13 mo
Brand assets	Your Quillmark kit (nib, banner)	Consistent identity	Owned
Email / CRM	Shopify Email / Klaviyo	Repeat sales, abandoned cart	\$0 to start
Content	CapCut + phone	Short-form video for reach	\$0
Scheduling	Buffer / Metricool / native	Batch & auto-post	\$0–\$15 mo
Analytics	GA4 + Pinterest + platform pixel	See what converts	\$0
Payments	Shopify Payments / PayPal	Take money	% per sale
Domain	quillmark.<tld>	Trust & email	~\$12 / yr

The design pipeline (idea → live listing)

1. **Pick the niche & the feeling** — who is this for and what do they want to signal?
2. **Generate the concept** — text-led designs (typography + a clever line) and AI/vector art. Keep it original; never copy protected work.
3. **Compose in Canva** at print resolution (300 DPI; transparent PNG for apparel).
4. **Push to the POD supplier** — place the art on the product matrix, auto-generate mockups.
5. **Publish with SEO** — keyword-rich title, tags, description (see listing SOP in §8).
6. **Syndicate** — the mockup becomes Pinterest pins and a short video. One design = one design job + many marketing assets.

What happens automatically when an order comes in

Step	Who does it	You?
Customer pays	Storefront + payment processor	No
Order routed to printer	Auto-sync (Printify/Printful app)	No
Item printed	Print partner	No
Shipped + tracking sent	Print partner → customer	No
Post-purchase email + review ask	Email automation	Set once

Step	Who does it	You?
Customer service / refunds	You (templates in §8)	~5 min as needed

Day-1 build checklist

Domain bought · Quillmark logo + banner loaded · Etsy (or Shopify) store live · POD app connected & a test order placed to yourself · payments verified · 5 listings published. That is a launchable store in an afternoon.

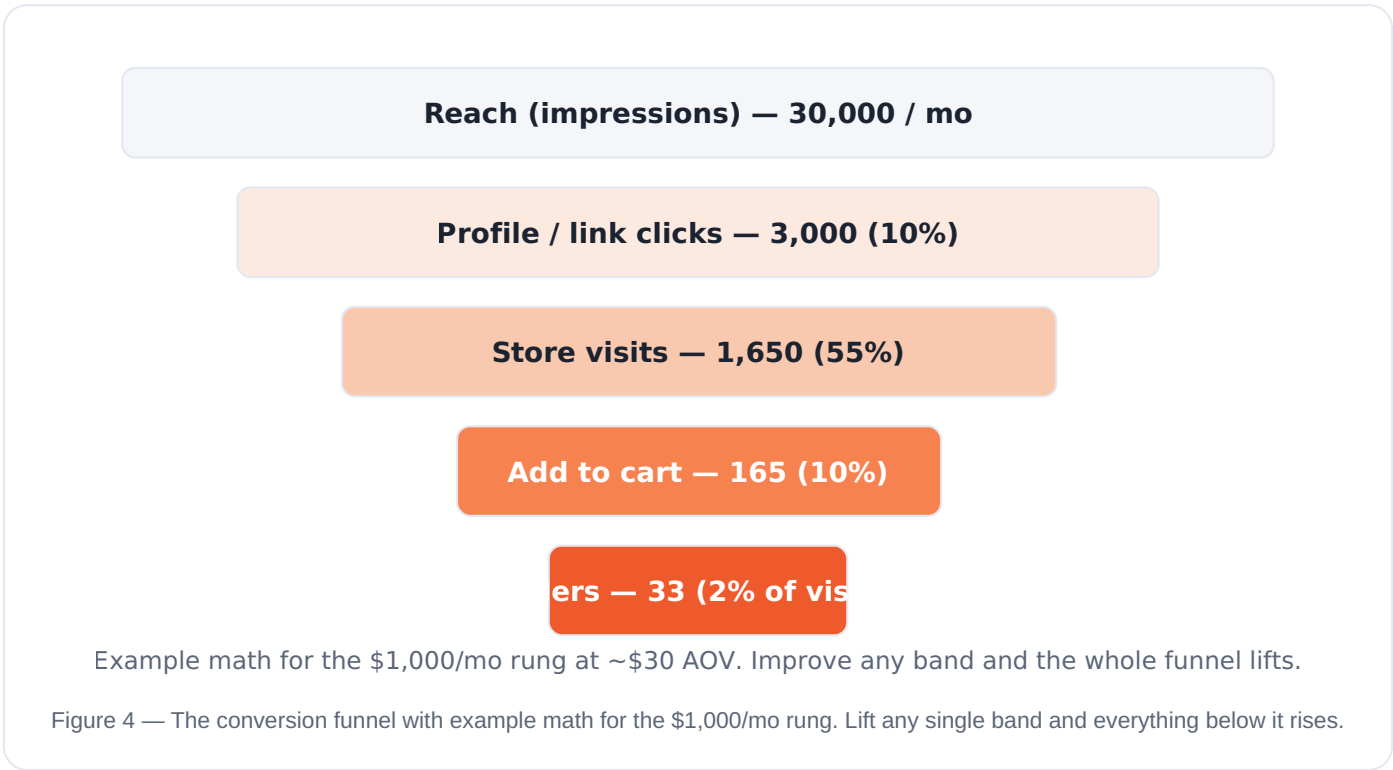

SECTION 4

The Funnel

How a stranger scrolling a video becomes a paying customer — and then a repeat one.

4 · The Funnel — how the money flows

Sales are not luck; they are a funnel. Each stage has a number you can improve. Quillmark’s funnel is built so that **free attention** at the top can carry the whole thing until you choose to add paid fuel.

Top of funnel — where attention comes from

Channel	Why it works for POD	Cost	Speed
TikTok / Reels / Shorts	Designs are visual; a single video can reach thousands free	Free	Fast, spiky
Pinterest	Buyers search with intent; pins sell for years	Free	Slow build, compounding
Etsy search	Built-in shoppers already looking to buy	Listing fee	Medium
SEO / blog	‘Best gifts for X’ round-ups send buyers	Time	Slow, durable
Paid (Meta / Pinterest / Etsy Ads)	Pour fuel on proven winners	\$5–\$20/day	Instant, costs money

Middle — turning a visit into a sale

- **The listing is the salesperson.** First photo = scroll-stopping mockup on a clean or lifestyle background. Title and first line answer “is this for me?” in two seconds.

- **Proof.** Reviews and “X sold” do the convincing. Your first job after launch is harvesting reviews (a polite post-purchase ask + a tiny incentive).
- **Friction kills.** Clear sizing, shipping time stated up front, easy returns policy. Every unanswered question is a lost sale.
- **Gentle urgency.** Seasonal/limited drops and “order by X for delivery by Y” convert browsers now instead of “later” (which never comes).

Raising the average order value (AOV)

Tactic	Mechanism	Typical lift
Order bump	“Add matching mug for \$9” at checkout	+10–20% AOV
Volume discount	“Buy 2, save 10%”	+units per order
Curated bundle	Themed set of 3 at a set price	+AOV & clears winners
Free-shipping threshold	“Free shipping over \$35”	Nudges a second item

Bottom & beyond — retention is the real profit

The first sale often just covers acquisition. The **profit is in the second and third order**, where you pay nothing to reacquire the customer.

- **Capture the email** at checkout and via a small welcome offer.
- **Automate three emails:** welcome + first-order nudge, abandoned-cart recovery, post-purchase review ask & cross-sell.
- **Seasonal re-engagement:** new-drop announcements to past buyers convert far above cold traffic.

Funnel rule of thumb

If sales are slow, diagnose top-down: **No reach?** → post more / better content. **Reach but no clicks?** → fix the thumbnail/hook. **Clicks but no sales?** → fix the listing, price, or proof. Always fix the highest leaky band first.

SECTION 5

Feasibility Study & the Revenue Ladder

What it costs to start, when it pays for itself, and exactly what each income milestone requires.

5 · Feasibility Study & the Revenue Ladder

5.1 — Startup capital required

Three funding levels. You can genuinely begin at the lean tier and let revenue fund the rest.

Lean launch — Etsy, organic only

Item	Cost
Etsy listings (25 × \$0.20)	\$5.00
Canva Pro (optional, monthly)	\$0–\$13
Domain (optional early)	\$0–\$12/yr
Sample order (recommended, 1 item)	\$15–\$25
Total to open the doors	\$15 – \$50

Standard launch — Shopify + Etsy

Item	Cost
Shopify Basic (first month)	\$39
Domain	\$12/yr
Canva Pro	\$13/mo
3–4 sample items (quality check)	\$60–\$90
Apps (email, reviews — free tiers)	\$0
Total month one	~\$125 – \$155

Comfortable launch — adds a paid-ad test

Item	Cost
Everything in Standard	~\$150
Paid ad test budget (30 days)	\$150–\$450
Premium apps / scheduler	\$15–\$40/mo
Extra samples for content	\$60–\$120
Total month one	~\$400 – \$750

Break-even

On the **lean Etsy** path fixed costs are near zero, so you are profitable on roughly the **first sale**. On the **Shopify standard** path, fixed cost is ~\$52/mo (Shopify + Canva), so break-even is about **5 orders/month** — i.e. the \$5/day rung pays for the whole tool stack.

5.2 — The Revenue Ladder

This is the heart of the study: every income milestone you named, translated into the **orders, traffic, catalog size and time** it actually takes. Assumptions: **\$30 average order**, **~\$10 profit/order** before ads, **~2% store conversion**.

Figure 5 — The revenue ladder. Same machine at every rung; you are just adding designs and attention.

Rung	Revenue	Orders	Visits / mo needed	Catalog size	Primary engine	Realistic timing*
Proof	First \$1	1 sale	~50	5–10 listings	Organic + share to friends	Week 1–3
\$1/day	~\$30/mo	~1/mo	~50	10–25	Organic content	Month 1
\$100/mo	~\$3.3/day	3–4/mo	~175	25–50	Organic + Etsy search	Month 1–2
\$5/day	~\$150/mo	~5/mo	~250	40–75	Organic, reviews building	Month 2–3
\$10/day	~\$300/mo	~10/mo	~500	60–100	Organic + Pinterest compounding	Month 3–4
\$1,000/mo	~\$33/day	~33/mo	~1,650	100–150	Organic + email + light ads	Month 5–7
\$5,000/mo	~\$166/day	~167/mo	~8,350	150–300+	Winners + paid ads + repeat buyers	Month 9–15

*Timing assumes consistent execution of the \$7 content plan. POD is competitive; these are planning targets, not promises. Some niches move faster, some slower.

5.3 — What changes as you climb

Rungs 1–4 (\$1–\$10/day)

- **Engine:** 100% free organic + marketplace search.
- **Your job:** publish designs, post daily, get the first 10 reviews.
- **Spend:** ~\$0 ads. Reinvest profit into more designs/samples.
- **Goal:** find 3–5 designs that actually sell. That data is worth more than the revenue.

Rungs 5–6 (\$1k–\$5k/mo)

- **Engine:** scale winners with paid ads + an email list of past buyers.
- **Your job:** shift from making everything to *doubling down* on proven niches; bring in a VA/designer (\$8).
- **Spend:** reinvest 20–40% of profit into ads on proven designs only.
- **Goal:** repeatable acquisition where every \$1 in returns \$2+.

5.4 — 12-month scenarios

Month	Conservative (rev)	Base (rev)	Aggressive (rev)
1	\$0–30	\$30–100	\$150
2	\$30	\$120	\$400
3	\$75	\$300	\$800
4	\$150	\$500	\$1,400
6	\$300	\$1,000	\$2,800
9	\$600	\$2,200	\$4,500
12	\$1,000	\$3,500–5,000	\$7,000+

Drivers of the spread: number of designs shipped, content consistency, how fast you find winners, and whether/when you add paid ads. Effort — not luck — is what moves you from the left column to the right.

5.5 — The key ratios to watch

Metric	What it means	Healthy target
Gross margin / order	Profit after print + fees	30–45%
Conversion rate	Visits that become orders	1.5–3% (Etsy higher)
ROAS (if running ads)	Revenue per \$1 of ad spend	≥ 2.0x to scale

Metric	What it means	Healthy target
AOV	Average order value	\$30+ (raise with bumps/bundles)
Repeat rate	Buyers who buy again	15%+ once email is running

Feasibility verdict

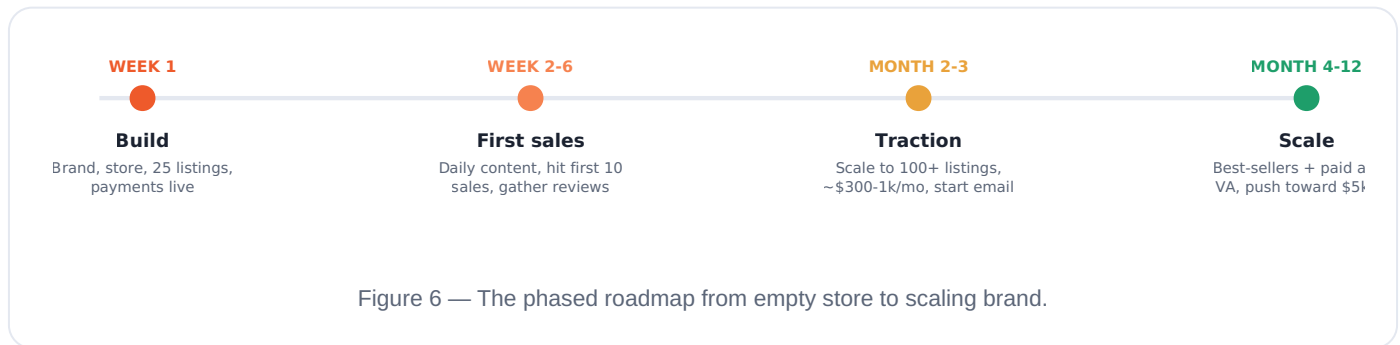

Financially feasible at low risk. The lean path costs less than a dinner out and is profitable on the first sale. The real investment is the **90-day content sprint** in §7. If you ship designs and post daily, the base-case ladder (\$1k/mo around months 5–7) is realistic; \$5k/mo is a function of finding winners and adding paid fuel.

SECTION 6

Go-To-Market & Scaling

The phased roadmap, exactly who to reach out to, and copy-paste outreach you can send today.

6 · Go-To-Market & Scaling

6.1 — The two growth engines

Organic engine (start here)

- Short-form video showing the design + the “who it’s for” moment.
- Pinterest pins for every product (compounds for months).
- Marketplace SEO (Etsy titles/tags).
- Cost: time. Ceiling: high but slower.

Paid engine (add after winners appear)

- Etsy Ads on proven listings.
- Pinterest / Meta ads on your best-converting design.
- Only scale spend while ROAS ≥ 2 .
- Cost: money. Ceiling: very high, fast.

6.2 — Who to reach out to (and why)

Outreach multiplies organic reach. Target people who already hold the attention of your niche:

Who	Why them	The ask
Micro-influencers (1k–50k) in your niche	Trusted by exactly your buyer; cheap or free	Gift a product for an honest post / affiliate code
Niche meme / fan pages	Massive cheap reach in one community	Paid shout-out or rev-share on a code
Pinterest creators & group-board owners	Evergreen, buyer-intent traffic	Collaborate / contribute pins
Facebook groups & subreddits for the niche	Concentrated superfans	Participate genuinely; share only where allowed
Complementary small brands	Shared audience, not competitors	Cross-promo / bundle collab
Local boutiques, gyms, salons, events	Real-world distribution	Wholesale or consignment of best-sellers
Affiliates / ambassadors	Sell for you on commission	10–20% per sale via code/link

Who	Why them	The ask
Etsy / gift round-up bloggers	'Best gifts for X' lists send buyers	Pitch your product for inclusion

6.3 — Outreach methods & copy-paste templates

Send 5–10 personalized messages a day. Personalize the first line; keep it short; make the ask tiny.

Micro-influencer gifting DM

Template

"Hi [name] — I love your [specific post about X]. I run **Quillmark**, we make original [niche] designs on tees & mugs. I'd love to send you a free [product] in your size — no strings. If you love it and want to share, even better. Can I get it shipped to you?"

Affiliate / ambassador pitch

Template

"Hey [name], your audience is exactly who our [niche] designs are for. Want to earn **15% on every sale** with your own code? You share what you already love, we handle printing & shipping, you get paid monthly. I'll set up [CODE] today if you're in."

Cross-promo with a complementary brand

Template

"Hi [brand] — we serve the same [niche] customer but don't compete (you do [X], we do apparel/print). Want to cross-feature each other to our audiences this month, or build a little bundle together? Happy to go first."

Wholesale / local stockist email

Template

"Hi [shop] — your customers are [niche] lovers and so are ours. We'd love to stock a small set of our best-selling [niche] designs with you on wholesale or consignment — no upfront risk to you. Could I drop off 5 samples this week?"

6.4 — Scaling levers (in order)

1. **More designs** in proven niches — cheapest growth; more lottery tickets.
2. **More products per winning design** — squeeze every winner across the matrix.
3. **More channels** — add Shopify, then Pinterest at scale, then ads.
4. **Email & repeat buyers** — the cheapest revenue you will ever get.
5. **Paid ads on winners only** — never advertise an unproven design.

6. **People** — a VA for listings/CS, then a designer for volume (see §8).
7. **New niches** — clone the whole playbook into an adjacent audience.

Scaling discipline

Do not add a new lever until the previous one is working. Most POD stores die from doing ten things badly. Quillmark wins by doing the next single highest-leverage thing well, then stacking the next.

SECTION 7

The 30-Day Content Plan

A day-by-day calendar so 'market it' becomes a checklist, not a mystery.

7 · The 30-Day Content Plan

Content is the free engine that powers rungs 1–4. The goal of month one is not perfection — it is **reps and signal**: post enough to learn what your niche reacts to, and get your first sales and reviews.

Content pillars (rotate these)

1 · Design reveal (“made this for [niche]”)

2 · Relatable niche humor / truth

3 · Behind the brand (the nib, the process)

4 · Social proof (reviews, “it shipped!”)

5 · Gift framing (“perfect for the [niche] in your life”)

Platform focus

Platform	Format	Cadence	Job
TikTok / Reels / Shorts	15–25s vertical video	1/day	Reach & discovery
Pinterest	Product pins + idea pins	3–5 pins/day	Evergreen buyer traffic
Instagram	Reels + carousel	4–5/wk	Brand + proof
Etsy/Shopify	New listings	2–4/wk	The asset that converts

The 30-day calendar

Each day = one short video + repurpose to other platforms + the listing/admin task. “DR”=design reveal, “H”=humor/relatable, “BTS”=behind the scenes, “SP”=social proof, “GIFT”=gift framing.

Day	Action (1 video · repurpose · 1 store task)
1	Launch: store live + announce. Post DR of hero design. List 5 products.
2	H video for niche A. Make 5 Pinterest pins. List 2 products.
3	DR design #2. Reply to every comment. Set up post-purchase email.
4	BTS: ‘why Quillmark / the nib’. List 2. DM 5 micro-influencers.
5	GIFT angle for niche A. Schedule weekend posts. List 2.
6	H video (trend audio). Pin batch. Ask first buyers for reviews.
7	Week-1 review: which post got most reach? Note the winner.
8	DR design #3 (lean into week-1 winner). List 3 products.
9	SP: screenshot any sale/review. H video niche B. Pin batch.
10	Collab DM day: 5 cross-promo / affiliate pitches. List 2.
11	GIFT bundle idea video. Set up an order bump at checkout.

Day	Action (1 video · repurpose · 1 store task)
12	DR design #4. Pinterest idea pin. Reply/engage 20 min.
13	H video remix of best week-1 hook. List 2.
14	Week-2 review: double down on best niche; cut what flopped.
15	DR design #5 in winning niche. Launch a small 'drop'.
16	SP compilation. Pin batch. Email past visitors the new drop.
17	BTS packaging/branding insert. List 3. DM 5 more creators.
18	GIFT angle niche B. Trend-jack with your design. Pin batch.
19	DR design #6. Add a volume discount ('buy 2 save 10%').
20	H video. Reach out to 1 local stockist / boutique.
21	Week-3 review: is a design selling? If yes, plan ad test.
22	DR design #7. Make 3 variations of your best-selling design.
23	SP + UGC ask ('tag us'). Pin batch. List 2.
24	GIFT seasonal angle. Set free-shipping threshold at \$35.
25	BTS '30 days in' story. Affiliate code for 1 creator who replied.
26	DR design #8. Repurpose top video to all platforms.
27	H video. Email list: review request + cross-sell.
28	Week-4 review: pick THE winner. Draft a \$5–\$10/day ad test.
29	Launch small ad test on the winner only. DR design #9.
30	Month review: revenue, best niche, best design, next-month plan.

Hook bank (steal these openers)

- “If you’re a [niche], this one’s for you...”
- “POV: someone finally made a [niche] shirt that isn’t cringe.”
- “Tag the [niche] in your life before [holiday].”
- “I made this because every [niche] I know needs it.”
- “Things only a [niche] will understand — on a mug.”

Batch it (the multi-business hack)

Do not create daily. Once a week, in one 90-minute block: design 3–5 pieces, film 7 short videos, and write 7 captions. Schedule them. Now 'daily content' costs you 15 minutes a day of posting + replying. This is what makes Quillmark survivable next to your other ventures.

SECTION 8

The Built-In Package

Your operating system: the daily routine, the SOPs, the dashboard, automation, hiring and risk — so it runs without living in your head.

8 · The Built-In Package — your operating system

This is the part that matters most for a founder running several businesses: a **system you can follow on autopilot** and hand to someone else. If you only operate the routines below, Quillmark runs in **30–45 minutes a day**.

8.1 — The daily 30-minute routine

- ☐ **(5 min)** Check orders & messages; answer any customer using a template.
- ☐ **(10 min)** Post today's pre-made video; pin 3–5 to Pinterest.
- ☐ **(10 min)** Reply to comments/DMs; send 3–5 outreach messages.
- ☐ **(5 min)** Glance at the dashboard: yesterday's sales, reach, any review to action.

8.2 — Weekly & monthly cadence

Weekly (~2 hrs, one block)

- ☐ Batch: 3–5 designs + 7 videos + captions, scheduled.
- ☐ Publish 2–4 new listings (SEO'd).
- ☐ Send one email to the list (new drop / tip).
- ☐ Review numbers; note best & worst performer.

Monthly (~1 hr)

- ☐ Cut dead listings; double down on winners.
- ☐ Check print costs/margins; adjust prices.
- ☐ Decide ad spend for next month (winners only).
- ☐ Plan next month's niches & drops.

8.3 — The KPI dashboard (track weekly)

Metric	Where	Target trend
Revenue & orders	Store backend	Up week over week
Conversion rate	Store analytics	Toward 2%+
Reach / profile clicks	Platform insights	Up; spot winning content
New reviews	Store	+ every week early on
Email list size	Email tool	Steadily up
ROAS (if ads on)	Ads manager	≥ 2.0x
Best design / niche	Your notes	Reallocate effort here

8.4 — Automation map (set once, runs forever)

Trigger	Automation	Tool
Order placed	Auto-send to printer, print, ship, tracking	POD app

Trigger	Automation	Tool
Order placed	Post-purchase thank-you + review ask	Email tool
Cart abandoned	Recovery email after 1–4 hrs	Email tool
New subscriber	Welcome + first-order offer	Email tool
Content	Pre-scheduled posts publish themselves	Scheduler
New listing	Auto-create Pinterest pin	Native / integration

8.5 — Standard Operating Procedures (hand these to a VA)

Listing SOP

1. Export 300-DPI PNG from Canva. 2) Upload to POD; place on the product matrix. 3) Generate mockups. 4) Title = “[keyword] [product] for [niche] — [occasion] gift.” 5) Fill all 13 Etsy tags with buyer search terms. 6) Description: who it’s for, materials, sizing, shipping time, care. 7) Set price from the margin table. 8) Publish & create one pin + one video.

Customer-service templates

Shipping question

“Thanks for reaching out! Your order is made to order and typically ships in 2–5 business days, with delivery around [date]. Here’s your tracking: [link]. Anything else I can help with?”

Refund / problem

“So sorry about that! We stand behind every Quillmark order. I’m arranging a free replacement/refund right now — could you send a photo so we can fix it with our print partner? Thank you for your patience.”

8.6 — When & who to hire

Trigger	Hire	Cost guide	Frees you to
~\$1k/mo & admin eats your time	VA (listings, CS, scheduling)	\$4–\$8/hr, ~10 hrs/wk	Strategy + content
Design is the bottleneck	Freelance designer	Per-design or retainer	Ship more winners
~\$5k/mo, ads working	Ads/marketing help	% or retainer	Scale spend safely

8.7 — Risk register & compliance (respect these)

Risk	Likelihood	Mitigation
Trademark / copyright strike	Medium	Original art only; never use brands, logos, lyrics, characters, athlete/celebrity names. When unsure, don't.
Market saturation	High	Win on specific niche + point of view, not generic designs.
Platform ban / policy change	Medium	Own a domain + email list; sell on 2 channels; never depend on one.
Print quality / shipping delays	Medium	Order samples; pick reliable suppliers; state times clearly; fast CS.
Chargebacks / refunds	Low–Med	Clear policy, sizing, photos; resolve fast; the print partner often covers defects.
Founder time / burnout	Medium	The batch + automation system above; delegate early.

Compliance one-liner

If a design uses someone else's name, brand, logo, character, photo, or lyric — do not list it. Original or licensed only. This single rule protects the whole business and the BNBHubs umbrella.

SECTION 9

The First 90 Days & Next Actions

From this booklet to a live, selling store — starting Monday morning.

9 · The First 90 Days & Next Actions

The first 7 days

Day	Do this
1	Buy domain. Set up Etsy (and/or Shopify). Load Quillmark logo + banner.
2	Connect Printify/Printful. Place a test order to yourself. Verify payments.
3	Create 5 designs in your top niche. Publish 5 listings (use the SOP).
4	Set up post-purchase + abandoned-cart emails. Make 15 Pinterest pins.
5	Film 7 short videos (batch). Write 7 captions. Schedule the week.
6	Go live: announce the store. Post video 1. Start the \$7 calendar.
7	DM 5 micro-influencers. Rest + review. You now have a running business.

30 / 60 / 90-day milestones

By day	Target	Leading indicator that matters more than revenue
30	First sales + first reviews; 25+ listings	You've identified your best-reacting niche & design
60	~\$150–\$500/mo; email list started	One design reliably sells — a proven winner
90	~\$300–\$1,000/mo; first ad test live	Repeatable: content → traffic → sales loop works

Do this Monday morning

Buy the domain, open the Etsy store, and publish ONE design. Perfection is the enemy — a live store with one listing beats a perfect plan with none. Everything in this booklet builds on that first published product.

Board recommendation

Approve the lean launch (<\$50 at risk). Commit to the 90-day content sprint as the real investment. Review at day 30/60/90 against the leading indicators above — not week-one revenue. Quillmark's value to BNBHubs is a compounding, automatable, low-capital income stream that does not compete for the same hours as the core businesses.

Appendix A · Tool & cost reference

Need	Free / cheap option	Paid upgrade	Notes
Storefront	Etsy (\$0.20/listing)	Shopify Basic \$39/mo	Run both once validated
Printing	Printify (free plan)	Printify Premium / Printful	Compare base cost + quality
Design	Canva free	Canva Pro \$13/mo	Brand kit, background remover
AI art/text	Free tiers	Paid as needed	Original art only
Email	Shopify Email / free tier	Klaviyo paid	Automations = repeat sales
Video	CapCut free	—	Phone is enough
Scheduling	Native schedulers	Buffer/Metricool \$0–15	Enables batching
Analytics	GA4, Pinterest, pixels	—	All free

Appendix B · Glossary & cheat sheet

Term	Means
POD	Print-on-demand: item is made only after it's ordered. Zero inventory.
AOV	Average order value — raise it with bumps & bundles.
Conversion rate	% of visitors who buy.
ROAS	Return on ad spend; revenue per \$1 of ads.
Margin	Profit left after print + fees.
SKU / listing	A single product page (one design on one product).
Mockup	A render of your design on a product, used in listings & ads.
UGC	User-generated content — customer photos/videos.

Quillmark on one page

Sell: original designs on POD products (zero inventory). **Make money:** ~\$10 profit/item, ~35% margin. **Get traffic:** daily short-form video + Pinterest + marketplace SEO (free), then ads on winners. **Start cost:** \$15–\$150. **Ladder:** \$1/day → \$10/day on organic; \$1k–\$5k/mo by scaling winners + email + ads. **Run it:** 30–45 min/day on batched content + automation. **Rule #1:** original art only. **Rule #2:** double down on what sells.

Prepared as a BNBHubs strategy document. All figures are planning assumptions for decision-making, not financial guarantees; print costs, fees and platform rules change — verify live before committing spend. This consolidates the Quillmark Income Structure, the 1–5 Year Board Plan, and the Founder & Operator Manual into a single operating package.
